CAREER OBJECTIVE

Highly motivated Artificial Intelligence and Data Science student seeking opportunities in Data Science and Software Development to apply programming, analytical, and problem-solving skills in developing innovative solutions, building machine learning models, and contributing to organizational growth while gaining industry experience.

EDUCATION

B.Tech in Artificial Intelligence and Data Science Rathinam Technical Campus CGPA: 7.99	2023 – Present
HSC Govt Girls Higher Secondary School Percentage - 83%	2022 – 2023
SSLC Maharishi Vidya Mandir Percentage - 80%	2020 – 2021

TECHNICAL SKILLS

Programming Languages

- Python
- Java

Databases

- MySQL
- PostgreSQL

Tools

- Excel
- Power BI
- Version Control (Git) & GitHub

Libraries

- NumPy
- Pandas

PROJECTS

Smart Farming AI Agent

GitHub Link: https://github.com/alreshveya-03/smart_farming_ai_agent.git 

Built a Smart Farming AI Agent using Python and Streamlit to detect crop diseases from leaf images. Integrated real-time weather data to generate intelligent, context-aware farming advice. Designed a modular system with treatment recommendations and feedback tracking for practical agricultural use.

Hostel Hub

Developed a full-stack hostel management system using Python, Streamlit, and MySQL to automate hostel operations. Implemented modules for room allocation, attendance tracking, leave management, complaints, and mess management. Integrated AI features such as complaint classification, room recommendation, sentiment analysis, and a hostel chatbot. Designed separate dashboards for students and wardens with real-time analytics and secure authentication.

CERTIFICATES

- AWS Academy Machine Learning Foundation (Current)
- Introduction to Data Science - DataCamp
- Introduction to SQL (Current) - DataCamp

SOFT SKILLS

- Teamwork
 - Adaptability
 - Creativity
- Communication
 - Critical Thinking
 - Time Management
